Draft Glebe Hill Reserve Activity Plan 2021-2030 - Survey

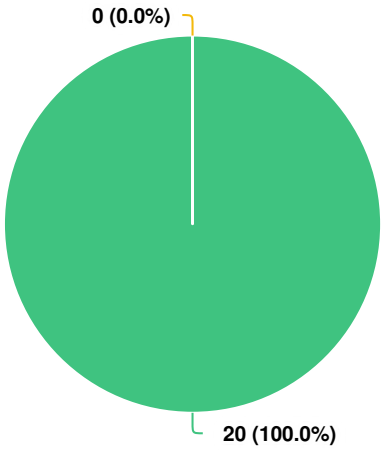

SURVEY RESPONSE REPORT
13 June 2019 - 29 August 2024

PROJECT NAME:
Glebe Hill Bushland Reserve Activity Plan 2021-2030

BANG THE TABLE engagementHQ

SURVEY QUESTIONS

Q1 Recommendation 1: Monitor and control texan needlegrass and crow garlic in reserve.

Question options

Agree Disagree

Optional question (20 response(s), 2 skipped)
Question type: Radio Button Question

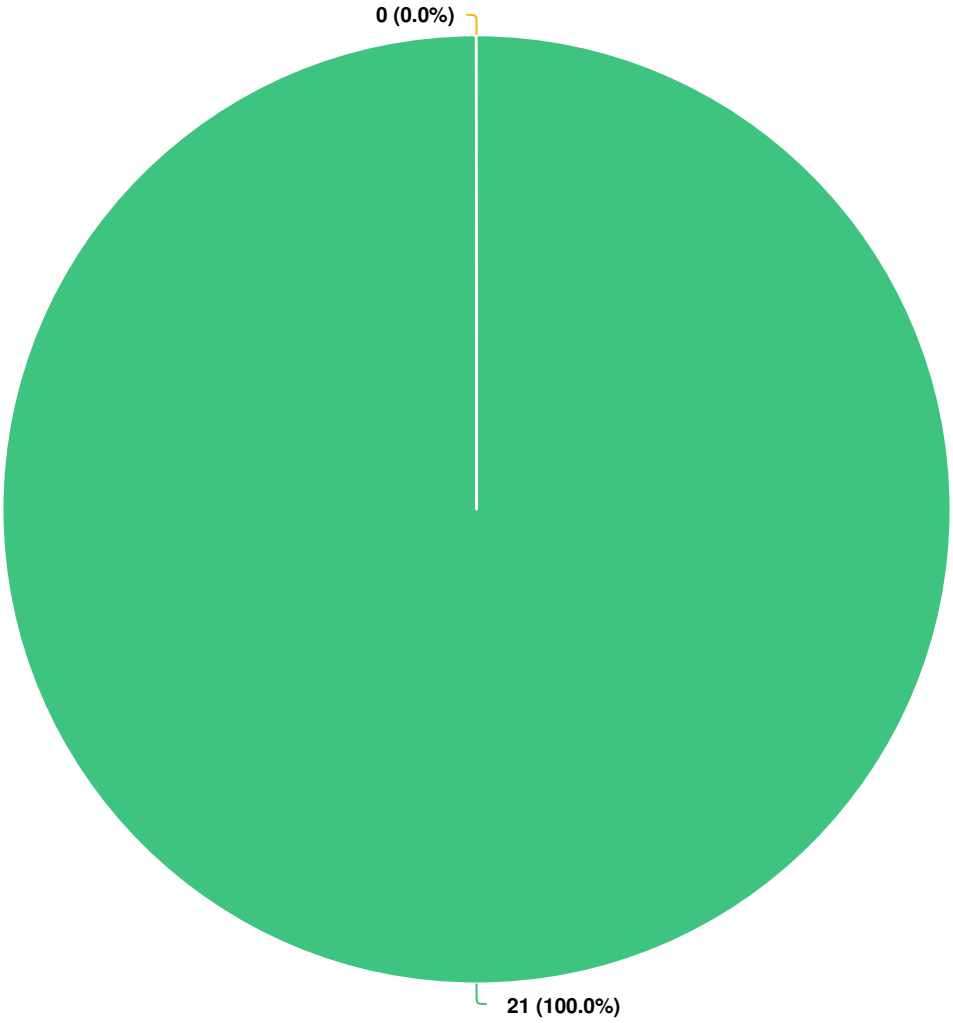

Q2 Additional comments (Recommendation 1).

Screen Name Redacted
4/12/2021 07:49 AM

Most bush naturally regenerate. It's more successful than human intervention. Most of the natives planted are not as successful as we would like but happy to monitor this.

Optional question (1 response(s), 21 skipped)
Question type: Essay Question

Q3 Recommendation 2: Undertake further nature-based education projects with Howrah Primary School.

Question options

Agree Disagree

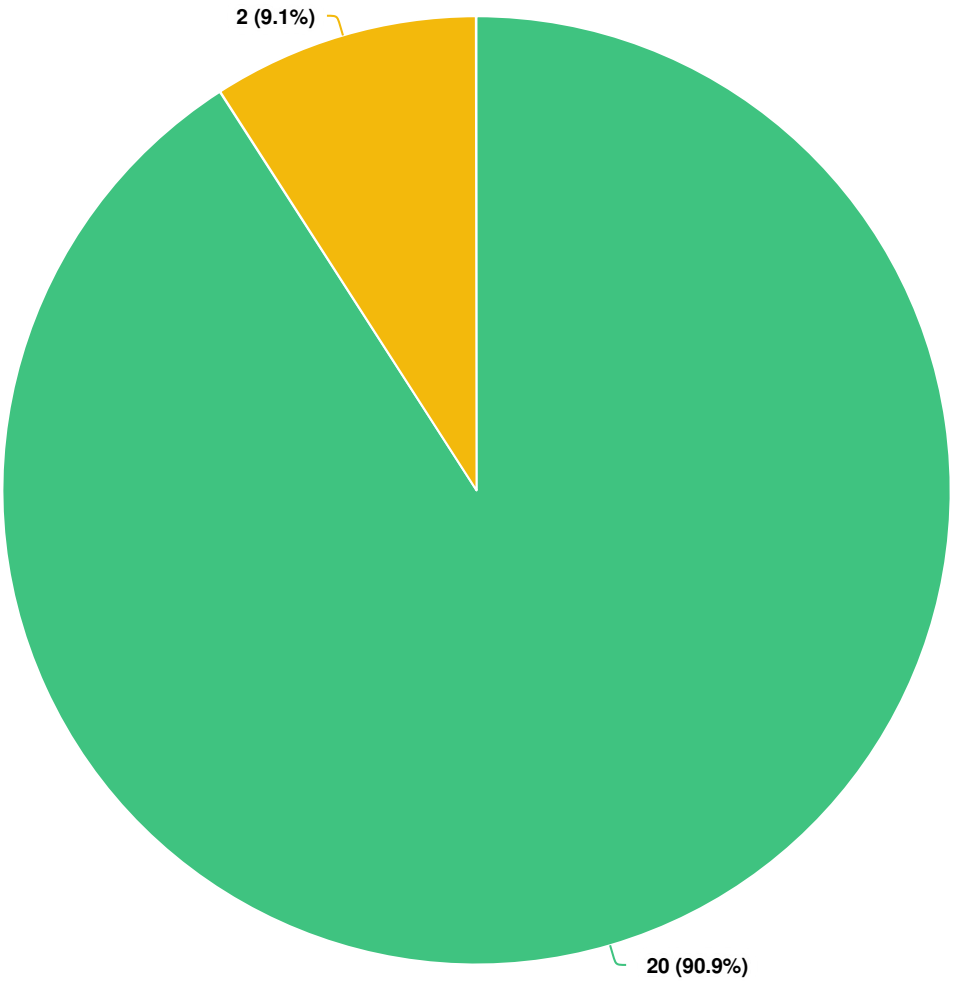

Optional question (21 response(s), 1 skipped)
Question type: Radio Button Question

Q4 Additional comments (Recommendation 2).

Screen Name Redacted 3/31/2021 03:38 PM	Not only howrah but all schools in the area
Screen Name Redacted 4/12/2021 07:49 AM	This area should be enjoyed by everyone. I'm sure the kids would love it ❤
Screen Name Redacted 4/13/2021 09:44 AM	Swift parrots frequent the gum trees at Howrah Primary School and Glebe Hill. There are there now in APRIL.
Screen Name Redacted 4/23/2021 12:24 PM	This is a fantastic way to engage the students and let them have some ownership of this lovely piece of bushland

Optional question (4 response(s), 18 skipped)
Question type: Essay Question

Q5 Recommendation 3: Develop an indigenous interpretation program.

Question options

Agree Disagree

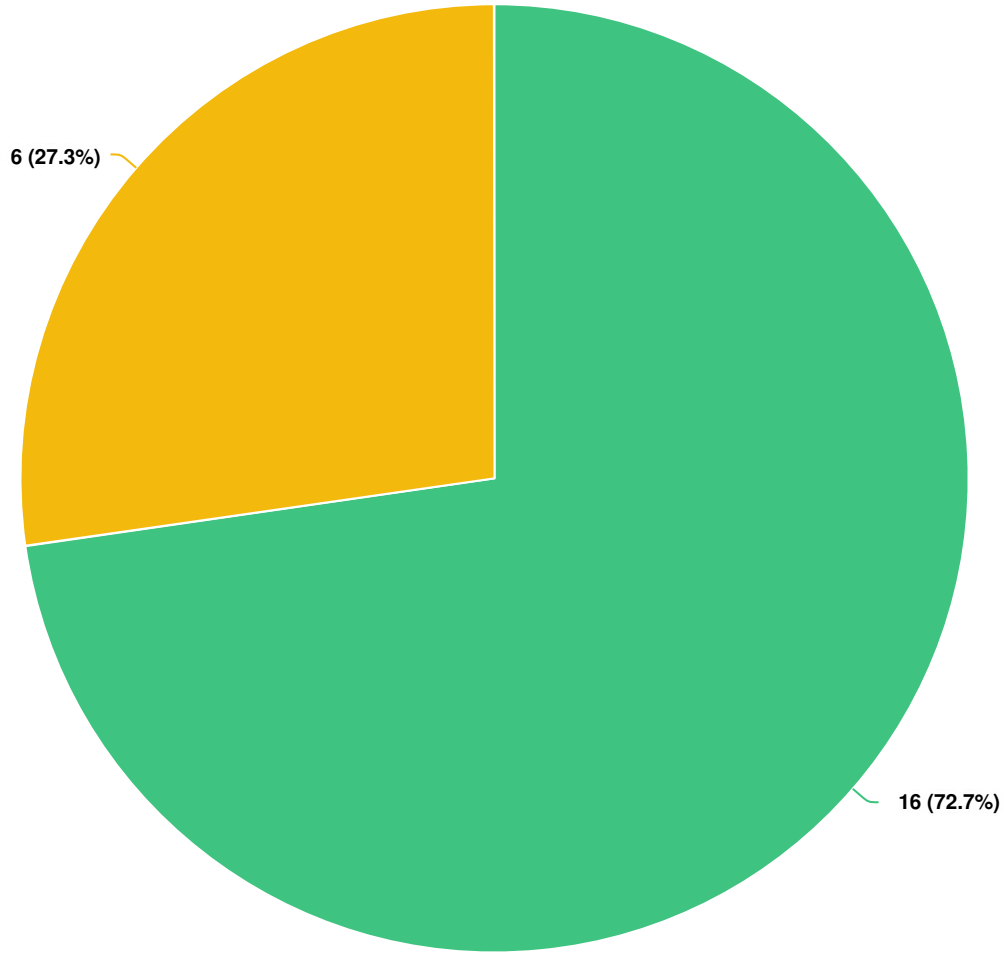

Optional question (22 response(s), 0 skipped)
Question type: Radio Button Question

Q6 Additional comments (Recommendation 3).

Screen Name Redacted 3/30/2021 08:36 PM	Need more detail.
Screen Name Redacted 4/12/2021 07:49 AM	If it pleases people

Optional question (2 response(s), 20 skipped)
Question type: Essay Question

Q7 Recommendation 4: Promote ‘dogs on lead’ area to protect native fauna.

Question options

Agree Disagree

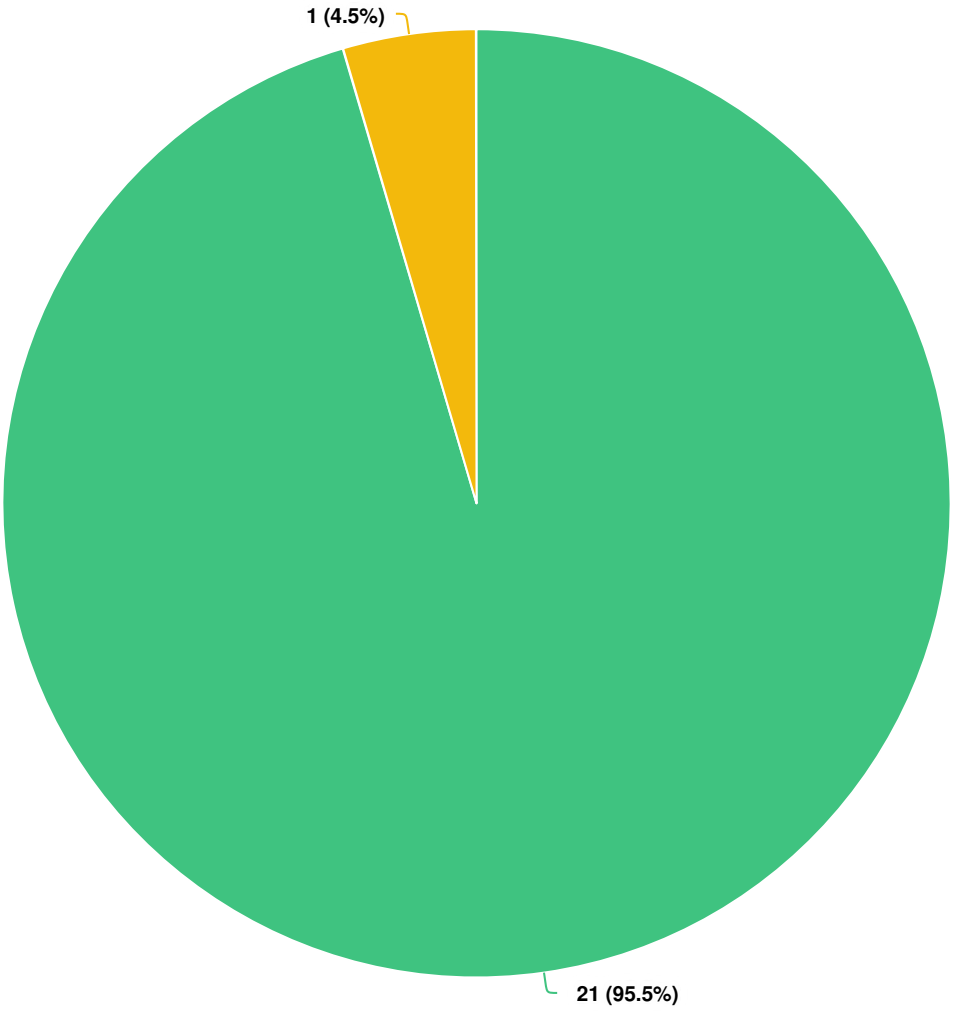

Optional question (22 response(s), 0 skipped)
Question type: Radio Button Question

Q8 Additional comments (Recommendation 4).

Screen Name Redacted 3/29/2021 08:41 PM	Strongly agree. Promote as a dog free area if possible.
Screen Name Redacted 4/04/2021 08:19 PM	I often walk my dog in the Glebe Hill Reserve, rarely seeing anyone else using this area apart from some other friendly dog walkers. The tracks are wide and the dogs stay on the tracks and don't destroy the vegetation. Similarly we love walking in the Waverley Flora park, rarely seeing anyone other than other dog walkers. My dog is shy and feels intimidated by other dogs at the South street park so having an area where she can exercise and feel safe, which are important facets for me too, is integral. The number of additional dwellings in this area is unbelievable and restricting dog exercise areas is not sustainable with the expected increase in population.
Screen Name Redacted 4/12/2021 07:49 AM	I walk there everyday. Mostly twice a day. How on earth does any dog cause damage to the fauna and flora. That's totally ridiculous. It's a huge area. And I've never seen any native animal harmed or dead from any dogs or cats. They take off when they hear anything. Please don't listen to wingers who complain about anything. Every dog I've seen up there has been supervised by their owners and causes no harm. We have possums coming onto our deck to eat the dog food, so they obviously don't feel threatened by dogs.
Screen Name Redacted 4/23/2021 12:24 PM	There is a considerable number of native animals in this reserve and keeping the area as a dogs on lead area would protect these
Screen Name Redacted 5/03/2021 03:46 AM	Enough of our eastern shore bush land is being developed and our wildlife is already suffering from development and no consideration for their corridors. I pull off at least 10 wallabies per day from the roads that have been hit as they continue to become trapped in areas they once moved through.

Optional question (5 response(s), 17 skipped)
Question type: Essay Question

Q9 Recommendation 5: Continue monitoring native fauna species in the reserve.

Question options

Agree Disagree

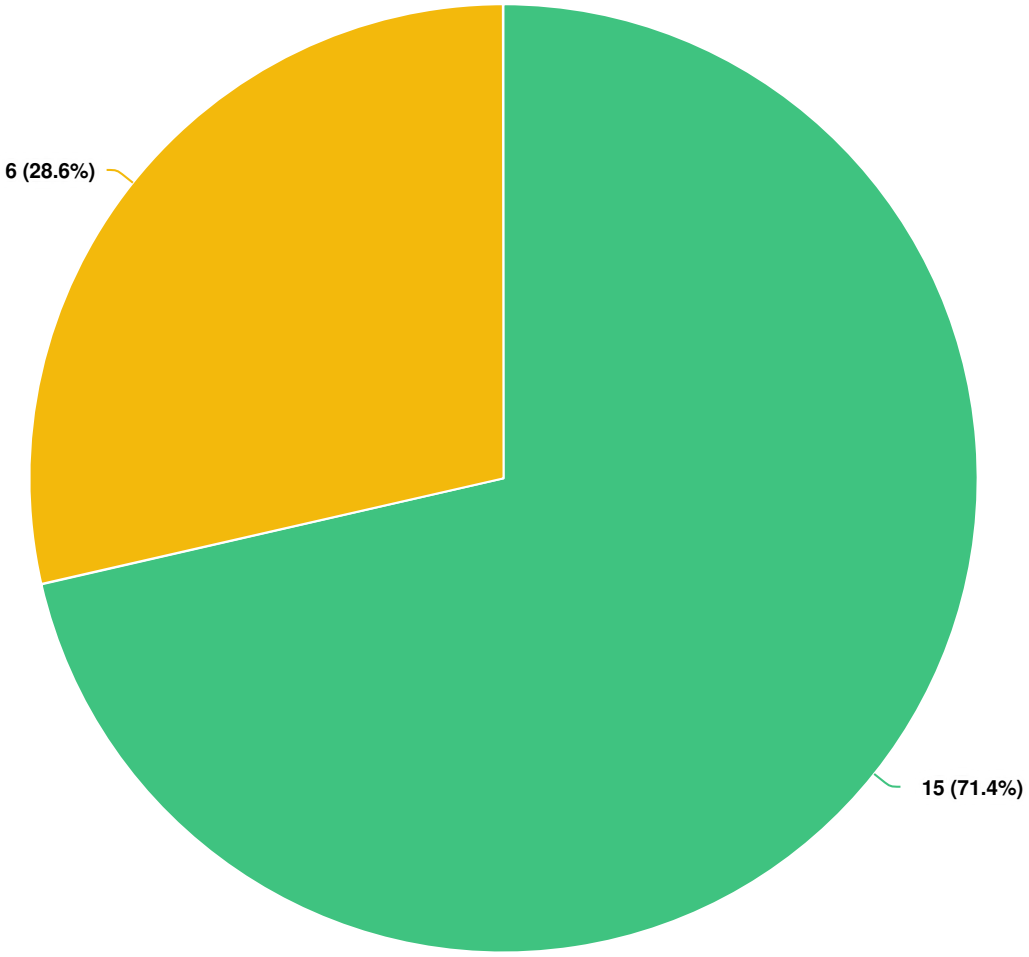

Optional question (22 response(s), 0 skipped)
Question type: Radio Button Question

Q10 Additional comments (Recommendation 5).

Screen Name Redacted 4/04/2021 03:29 PM	Dont just monitor: we must actively support the maintenance and building of natural habitat to support the populations. We have a significant amount of road-kill which is distressing to see. The animals must be under pressure with the urban expansion and seeking out food sources in localities ... which are now unfortunately, inhabited by humans. We MUST get better at this, and find a way to support the healthy fauna habitat and that protects them from road kill.
Screen Name Redacted 4/23/2021 12:24 PM	We a really fortunate to have native flora and fauna so close to a suburban area and we need to monitor these so we can protect these populations.

Optional question (2 response(s), 20 skipped)
Question type: Essay Question

Q11 Recommendation 6: Maintain official mountain bike trails and close all informal trails.

Question options

Agree Disagree

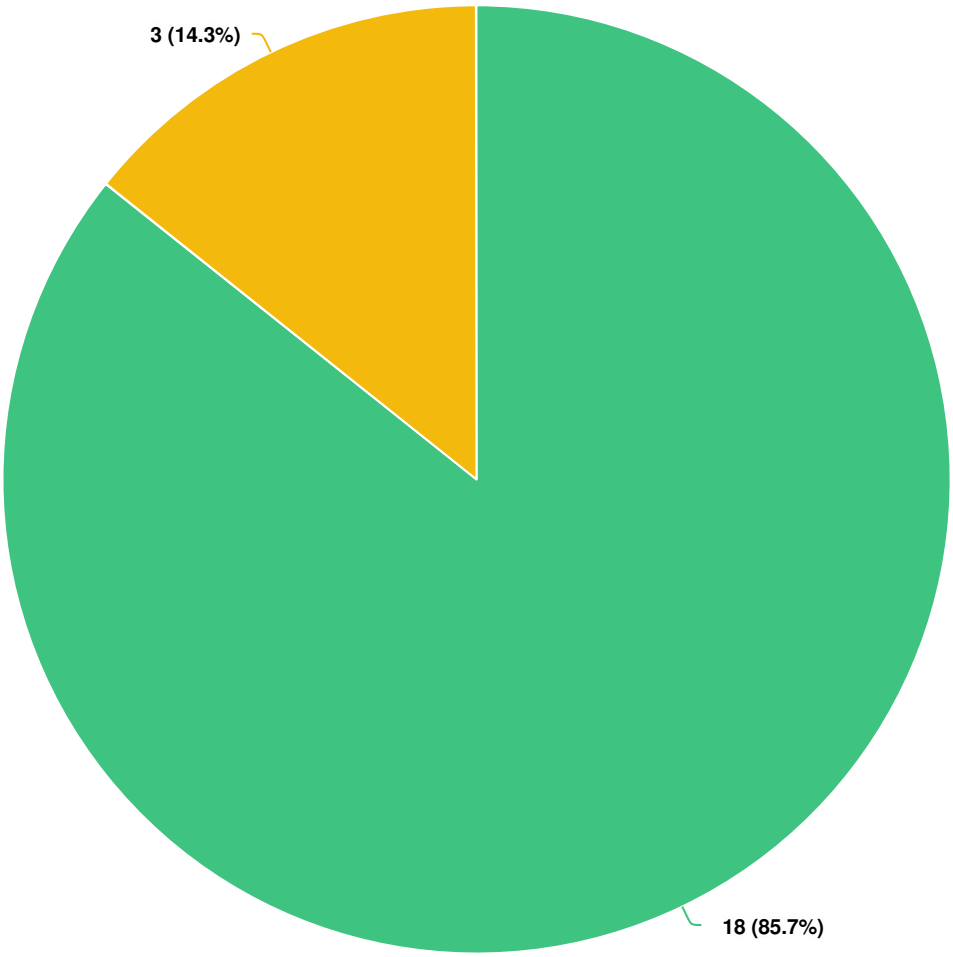

Optional question (21 response(s), 1 skipped)
Question type: Radio Button Question

Q12 Additional comments (Recommendation 6).

Screen Name Redacted 3/30/2021 04:44 PM	Informal trails (when responsibly used) offer riders unique opportunities to engage with bushland and panoramas unavailable on standard trails.
Screen Name Redacted 3/31/2021 03:38 PM	Don't need bike trails there is enough
Screen Name Redacted 4/07/2021 02:55 PM	There should not be any official mountain bike trails in this area. With the upgrade of the Meehan Range facilities, mountain bikers are adequately catered for. This area quiet bush area should be maintained for the use of walkers and runners. Many mountain bikes are travelling at great speed and its not a good mix to have them use the same area. Just look at the problems in the Mount Wellington area years ago with bikes and walkers using the same trails - they now have very safe single use areas.
Screen Name Redacted 4/12/2021 07:49 AM	The bike trails are fabulous and give families great entertainment. Well done on doing these tracks
Screen Name Redacted 4/22/2021 09:11 PM	along with walking tracks for the safety of walkers
Screen Name Redacted 4/23/2021 12:24 PM	I am not aware of mountain bike tracks in this area. I feel that there is great mountain bike facility at the Meehan range and other than perhaps facilitating some kind of link between Glebe Hill/Howrah and the Meehan it is not necessary to provide more mountain bike tracks in this area.

Optional question (6 response(s), 16 skipped)
Question type: Essay Question

Q13 Recommendation 7: Assess and report on vegetation condition and bird population trends.

Question options

Agree Disagree

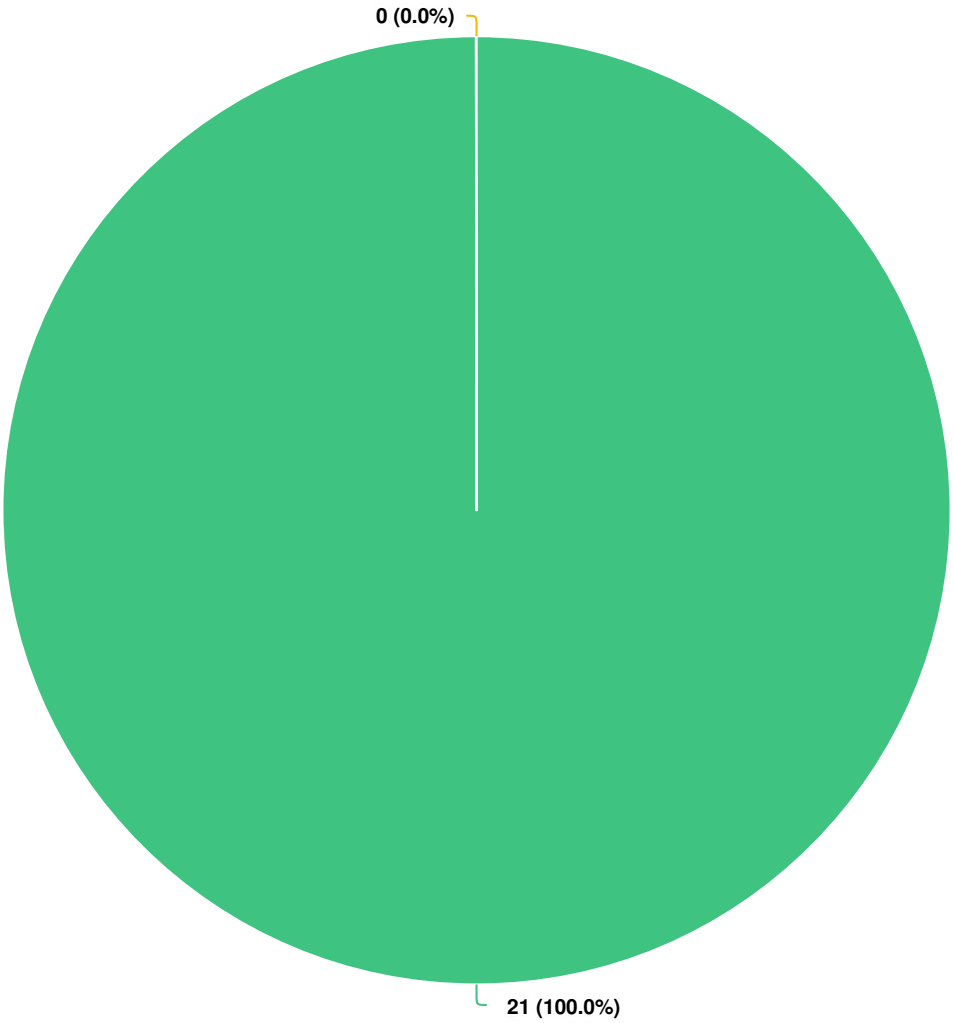

Optional question (21 response(s), 1 skipped)
Question type: Radio Button Question

Q14 Additional comments (Recommendation 7).

Screen Name Redacted 3/30/2021 08:36 PM	Increase trail network. Connect up with knopwood reserve.
Screen Name Redacted 4/04/2021 03:29 PM	No good just to "report:. We must take action on trend findings !! All too often, öur""actions are way too late.
Screen Name Redacted 4/12/2021 07:49 AM	I honestly think this is all getting a bit silly. It's been regenerating for many of our lives without help
Screen Name Redacted 4/13/2021 09:44 AM	Flocks of Swift Parrots in Glebe Hill now, April
Screen Name Redacted 4/23/2021 12:24 PM	As above, and these kind of activities are great to do in conjunction with Howrah Primary ie Landcare/citizen science/land conservation so the kids can learn about how to protect and maintain bushland areas

Optional question (5 response(s), 17 skipped)
Question type: Essay Question

Q15 Recommendation 8: Install track maps at all reserve entry points.

Question options

Agree Disagree

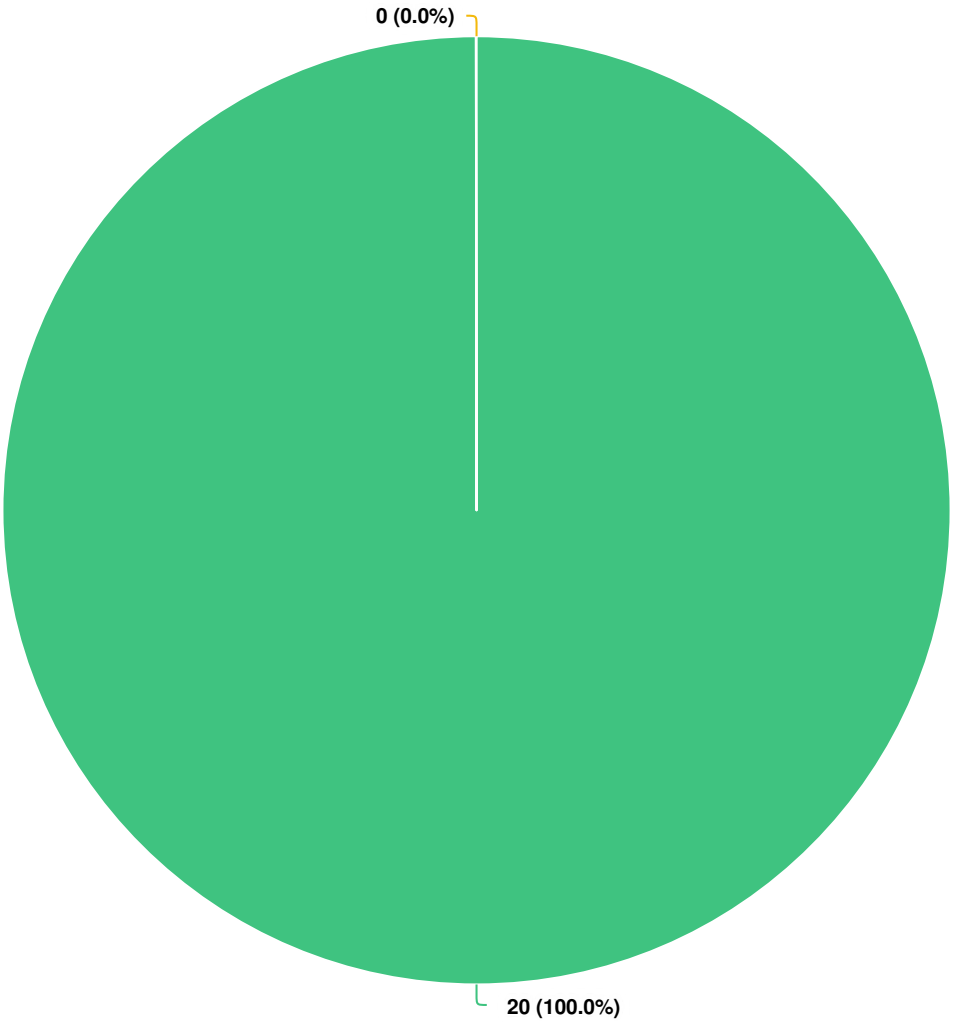

Optional question (21 response(s), 1 skipped)
Question type: Radio Button Question

Q16 Additional comments (Recommendation 8).

Screen Name Redacted 3/30/2021 07:56 PM	Entry points should be more clearly marked, especially between houses, and entry paths should be upgraded.
Screen Name Redacted 4/22/2021 09:11 PM	track maps throughout the park - to help guide direction of your walk
Screen Name Redacted 4/23/2021 12:24 PM	It is very helpful to know where you are going!

Optional question (3 response(s), 19 skipped)
Question type: Essay Question

Q17 Recommendation 9: Undertake primary weed control in Minno Street Reserve.

Question options

Agree Disagree

Optional question (20 response(s), 2 skipped)
Question type: Radio Button Question

Q18 Additional comments (Recommendation 9).

Screen Name Redacted 3/30/2021 03:30 PM	Also refurbish to more 'authentic' bushland reserve
Screen Name Redacted 4/22/2021 09:11 PM	I thin k the area needs to stay very similar to what's already there. but an improvement to the walking tracks (ie) knowing where you are going and estimates on how long it can take on different paths would be great
Screen Name Redacted 4/23/2021 12:24 PM	Providing that weeds are not poisoned with school substances that will cause damage to the native plants/animals and water ways!

Optional question (3 response(s), 19 skipped)
Question type: Essay Question

Q19 Do you have any additional comments on the Draft Glebe Hill Reserve Activity Plan 2021-2030?

Screen Name Redacted 3/29/2021 08:41 PM	Strongly support the ongoing environmental conservation and management of Glebe Hill reserve, especially limiting dog access where possible.
Screen Name Redacted 3/31/2021 04:09 PM	Controlling the cats that roam the area should be a high priority.
Screen Name Redacted 4/04/2021 03:29 PM	We must have more green belts in the Clarence community. Especially with the high volume of housing development. Build the reserves into the planning scape, not just "pat ourselves on the back" for maintaining a hill 'reserve'.
Screen Name Redacted 4/12/2021 07:49 AM	Glebe Hill Reserve is beautiful. Luckily we back onto it where we live. I have thanked your workers for all the wonderful work and enjoyment they have created near my home. Many many people enjoy it, a few will complain, but I've never seen any issues there. An occasional loose dog that may chase a wallaby. But they are smart and have plenty of space to run. We've left water buckets up there when it's very dry, and thrown carrots out for a treasure hunt to stop them eating our plants in the garden. It is why we live in the suburbs. Its a great place. Please don't change it.
Screen Name Redacted 4/12/2021 08:26 AM	Members of the Glebe Hill Bushland Reserve Landcare Group appreciate the renewed Activity Plan and are supportive of the key actions and recommendations it outlines.
Screen Name Redacted 4/13/2021 09:44 AM	Save the habitat for the endangered Swift Parrots who are back now.
Screen Name Redacted 4/23/2021 12:24 PM	I think you have a done a great job with the first stage of this project and look forward to continuing to use this lovely area that we are extremely fortunate to have close by. Thank you
